Continuing education credit: *Contact hours for this event are currently pending.*

Presented by:

The Colorado Health Literacy Coalition

Presentation topics include:

- Clear communication strategies.
- Panel discussion on “boots on the ground” resources for patients and clients.
- Local resources to address SDoH and low health literacy.

Learning objectives:

- Describe how trust building helps open doors to effective communication.
- Identify resources in the state that are available for those in high risk populations.
- Explain plain language best practices for any and all groups of people.

With presentations from:

Dean Schillinger, MD, is a primary care physician, scientist, author, and public health advocate. Dr. Schillinger is an internationally recognized expert in health communication and has been widely recognized for his work related to improving the health of vulnerable populations.

New this year: optional writing workshop

Choose from our traditional breakout session track, or a new hands-on writing workshop to apply health literacy and plain language best practices to write content appropriate for your audience.
